

2009 – 2010 Provincial Teams Program Head Coaches Announcement

With its continued advancements within the area of player development, BC Soccer's Provincial Teams Program has become a symbol for players and coaches who are dedicated to enhancing the development opportunities for elite players at the Regional, Provincial, and National Team level of play.

It is with a continued commitment to its players overall development that the BC Soccer is once again pleased and excited to announce the 2009 - 2010 Provincial Teams Program Head Coaches. See below for detailed information.

Under 13 Boys Head Coach: Darren Rath	Under 13 Girls Head Coach: Wayne Shaw
Under 14 Boys Head Coach: Rob Csabai	Under 14 Girls Head Coach: Ken Garraway
Under 15 Boys Head Coach: Dante Zanatta	Under 15 Girls Head Coach: Donn Sparks
Under 16 Boys Head Coach: Michael Findlay	Under 16 Girls Head Coach: Markus Reinkens

The Provincial Teams Program professional and nationally certified coaches continue to provide a "Player First" focus as it relates to its overall program mandate.

This provincial wide development program, which includes a seven month evaluation process, ultimately selects a total of 144 male and female players from the ages of U13 through U16.

Once selected, these players enter a responsible but intense professional training and development environment. This environment includes domestic and international experiential soccer travel opportunities. These development focused trips have been created to provide the best possible opportunities for players to experience and benefit from the travel and training environment they may encounter at the international level of play.

It is the goal of BC Soccer to continue the growth and provide standards for a recognized Provincial Teams Program.

This will provide the elite soccer players in British Columbia an opportunity to reach their full potential within the overall BC Soccer / Canadian Soccer Association / Whitecaps FC model for development, which supports the CSA Long Term Development Model.
